

WI-Series Configuration Utility Update

A-WR0802
September 12, 2008

A product change has been made to the WI Series Configuration Utility. This latest change fixed a few Project header screen descriptions.

Instructions for upgrading the WI Series Configuration Utility

Step 1

Backup your current projects before proceeding.

1. Open the program WI Series Configuration Utility
2. Select File from the menu then select Backup Project
3. Repeat these steps for each project

Or, to back up all Project Files at once:

In most cases the files can be found in the following location on your hard drive:

c:\Program Files\WI Series\Projects

Find this folder on your hard drive and save a copy of it (in a separate location) before proceeding.

Step 2

Uninstall the current WI Series Configuration Utility:

1. Click on the Start menu (bottom left)
2. Select Control Panel
3. Select Add or Remove Programs
4. Select WI Series Configuration Utility from the list of programs
5. Click Remove

Step 3

Install the new version of WI Series Configuration.

1. Download the software (zip file) from <http://wireless.weidmuller.com>
2. Open the zip file and select the .exe file to begin installation
3. Follow the steps of the setup wizard to complete the installation
